

Nigerian Journal of Technology

VOLUME 37, NUMBER 2, APRIL 2018

SECTION A: BUILDING, CIVIL & GEOTECHNICAL ENGINEERING

Seasonal Variations of the Vertical Total Electron Content (VTEC) of The Ionosphere at the GNSS Cor Station (SEERL) Uniben and three other Cors Stations in Nigeria.	E. O. Elemo, M. O. Ehigiator and R. Ehigiator-Irughe	286 -293
Formulation and Implementation of Mathematical Models Suitable for Deformation Analysis of Structures	M. O. Ehigiator and R. Ehigiator – Irughe	294 - 301
Implications of Highway Development and Expansion on Urban Resident in Nigeria: A Case Study of Abeokuta Metropolis.	O. J. Afolabi, O. A. Oyetubo and O. A. Oluwaji	302 -308
Geochemical and Sedimentological Characteristics of the Late Quaternary Sediments of the Anambra Basin	M. E., Okiator, J. E., Ighodaro, E. D. Ogueh and M. I. E Nnaji	309 - 314
Behaviour of Periwinkle Shell Ash Blended Cement Concrete in Sulphuric Acid Environment	I. C. Attah, R. K. Etim and D. U. Ekpo	315 -321
Characterisation and Grading of Three Selected Timber Species Grown in Kwara State Nigeria According to EN 338 (2009) for Structural Use	A. A. Jimoh and B. J. Ibitolu	322 - 329
The Impact Resistance Effect of Partially Replacing Coarse Aggregate with Ground-Rubber Aggregate in Concrete	A. Ocholi, M. Y. Sanni, and S. P. Ejeh	330 - 337
Potential of Glass Cullet as Aggregate in Hot Mix Asphalt	H. M. Alhassan, G. H. Yunusa and D. Sanusi	338 - 345
